SIMPLE & EASY-TO-USE ACCESS CONTROL AND TIME & ATTENDANCE SOFTWARE

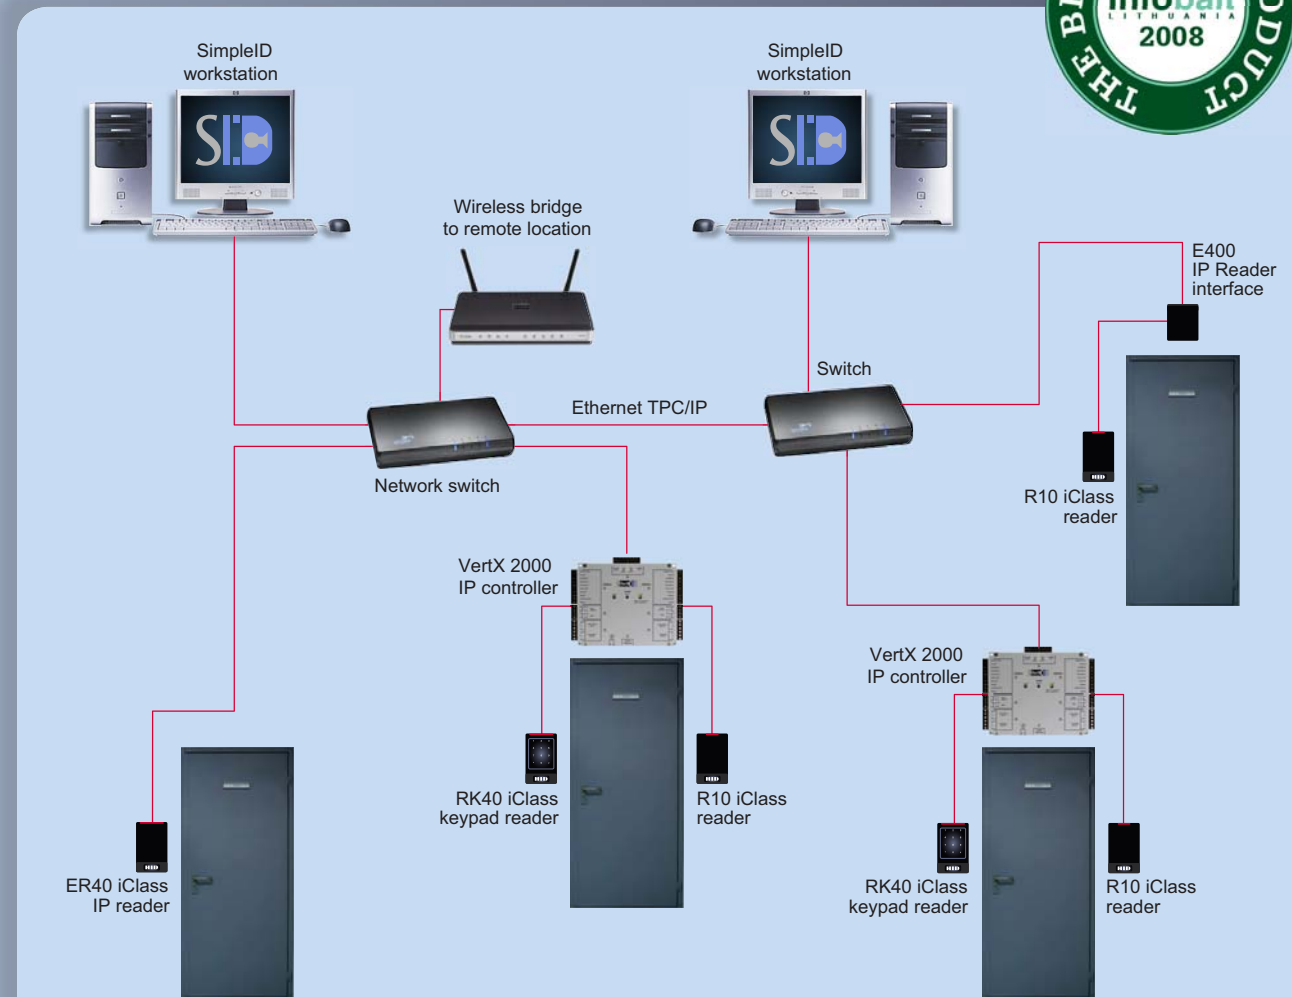

SimpleID software unlocks the power of the most advanced access control hardware currently available in the industry: HID & Suprema IP readers and controllers. By combining the unique benefits of the new generation readers and controllers with user-friendly graphic interface, SimpleID provides an ideal solution for IT-driven security projects.

What makes SimpleID different?

- Minimal training requirements for end-users
- Minimal training requirements for technicians
- Minimum maintenance
- Minimal installation costs
- Maximum profit for distributors and installers

This set of 5 M's provides tangible benefits for security installers, dealers and integrators who seek competitive advantages in the security market.

QUICK FACTS:

- Access control
- Alarm monitoring
- Time & attendance
- Vector graphics maps
- Animated event display
- Automatic database maintenance
- Integration with major manufacturers
- Unlimited PC workstations

SimpleID benefits

Superior monitoring features:

animation, clear icons, vector graphics, real-time events on the maps

Impressive scalability: start from just one IP reader and expand the system to hundreds of readers distributed all over the LAN/WAN.

Worry-free usage: scheduled automatic database sweep and backup.

Single-click system updates:

software automatically detects and upgrades the existing installation and database.

“Push” technology: events are not polled. Instead they are pushed by IP reader/controller, which means they are displayed without any delays.

Extensive reports: time & attendance, users, events, access rights
[YourBrandName][™]: SimpleID supports skins what makes it easy for installers and integrators to add their own look and feel to the software.

Multilingual GUI: built-in translation tool allows translating or correcting the user interface text on the fly. All languages are supported.

SIMPLE AND EASY-TO-USE ACCESS CONTROL & ATTENDANCE SOFTWARE

Clear an intuitive: any IT specialist can have the system configured and running in less than 15 minutes simply by following easy step-by-step instructions.

No experience in security necessary!

Unleash the power of VertX & Edge:

Edge: pure IP system, high-speed communications, Power-over-Ethernet, reduced wiring, fault-tolerance and much more...

Supported hardware:

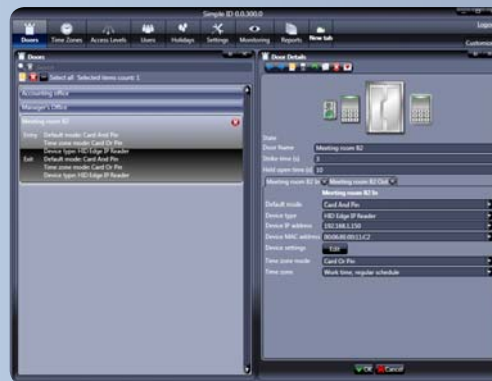

HID VertX[™] V2000 2-door network controller, EdgeReader ERP40 multi-CLASS[™] & ER40 iClass[™] IP readers, E400 1-door network controller, Suprema BioEntry Plus & BioStation fingerprint IP readers, OmniKey 5321 USB smart card reader, Suprema BioMini USB finger scanner, & GSM modems.

System Requirements

Intel Pentium IV 2Ghz, AMD Athlon 2500+ or better, dual core recommended
ATI Radeon HD 4800, nVidia 8500GT, or other
DirectX 10-capable graphics card
1 Gb RAM
MS Windows XP/Vista/7
MS SQL 2005/2008 Express Database
MS .Net Framework v2.0, v3.0 v3.5 and v3.5SP1

Door Settings

Time Schedule Configuration

User Management

Live Event Monitoring

About Midpoint Security

Established in 2001 with headquarters in Houston, Texas, Midpoint Security is an innovative provider of high-technology solutions for the security industry. By focusing on usability and design of new intelligent operator interface, Midpoint is taking security solutions to a new level.
